## SUMMARY

Please remember this is a Transfer Station **NOT** a landfill site. Everything is removed, nothing is buried. Remember too, why you choose to live here and extend those thoughts to the Tip when you next visit. It too is part of our beautiful environment. As a one-man-operated Transfer Station your co-operation is essential. If everyone tries to stick to the above guidelines, then I'm pleased to continue directing this valuable community resource into its twenty-second year of operation.
